Art Unit: 1762

DETAILED ACTION

Election/Restrictions

- 1. Restriction is required under 35 U.S.C. 121 and 372.
- 2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
- 3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
 - Group I, Claims 1-38, drawn to a composition for on-site forming gaskets which
 comprises 10-100% by weight of a vinyl polymer having at least one group represented
 by formula (1) per molecule at its molecular end, wherein a cured product prepared by
 curing the composition has a compression set of 40% or less according to JIS K 6262;
 - Group II, Claims 39-46, drawn to a gasket;
 - Group III, Claims 47-48, drawn to a method for preparing a curable composition which
 comprises mixing 10-100% by weight of a vinyl polymer having at least one group
 represented by formula (1) per molecule at its molecular end, wherein a cured product
 prepared by curing the composition has a compression set of 40% or less according to
 JIS K 6262;
 - Group IV, Claims 49-62 and 65-66, drawn to a (meth)acrylic polymer which has at least one group represented by formula (1) per molecule at its molecular end, as well as a composition and molded product comprising said polymer; and
 - Group V, Claims 67-69, drawn to a curable composition which comprises a (meth)acrylic polymer having ethyl acrylate and/or an alkoxyalkyl acrylate as an essential constitutional unit and at least one group represented by formula (1) at its molecular end.
- 4. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features.

Art Unit: 1762

5. As provided in 37 CFR 1.475(a), a national stage application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept ("requirement of unity of invention"). Where a group of inventions is claimed in a national stage application, the requirement of unity of invention shall be fulfilled **only** when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

- 6. The determination whether a group of inventions is so linked as to form a single general inventive concept shall be made without regard to whether the inventions are claimed in separate claims or as alternatives within a single claim. See 37 CFR 1.475(e).
- 7. As provided in 37 CFR 1.475(b), a national stage application containing claims to different categories of invention will be considered to have unity of invention if the claims are drawn **only** to one of the following combinations of categories:
 - (1) A product and a process specially adapted for the manufacture of said product; or
 - (2) A product and process of use of said product; or
 - (3) A product, a process specially adapted for the manufacture of the said product, and a use of the said product; or
 - (4) A process and an apparatus or means specifically designed for carrying out the said process; or
 - (5) A product, a process specially adapted for the manufacture of the said product, and an apparatus or means specifically designed for carrying out the said process.

Art Unit: 1762

8. Groups I-V lack unity of invention *a posteriori* over Nakagawa et al (WO 99/43719; US 6,964,999 referred to herein as the English equivalent)

- 9. Regarding Groups I-V, the common technical feature is encompassed by a composition which comprises a vinyl polymer having at least one group having the formula $-OC(O)C(R^a)=CH_2$ at its molecular end, wherein R^a represents hydrogen or an organic group having 1-20 carbon atoms.
- 10. Nakagawa teaches a vinyl polymer having at least one terminal group of the general formula (1) per molecule:

$$-OC(O)C(R)=CH_2$$
 (1)

wherein R represents hydrogen or an organic group containing 1-20 carbon atoms (Abstract).

- 11. Therefore, the common technical feature does not define a contribution over the prior art of Nakagawa, and thus does not constitute a special technical feature.

 Consequently a lack of unity is present between the inventions of Groups i-V.
- 12. The Examiner elected to mail the requirement for restriction based on the complex nature of the requirement and the requirement's reliance on a prior art reference.
- 13. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Application/Control Number: 10/573,863

Art Unit: 1762

14. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Page 5

- 15. Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof.

 Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case.

 Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 16. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 17. The examiner has required restriction between product and process claims.

 Where applicant elects claims directed to the product, and the product claims are

Application/Control Number: 10/573,863

Art Unit: 1762

subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

Page 6

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Art Unit: 1762

Conclusion

18. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ROBERT JONES JR. whose telephone number is (571)270-7733. The examiner can normally be reached on Monday - Thursday, 9 AM -

5 PM.

19. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

20. Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
